

## GENIE Community Builder Quest: The \$NOSHIT Points Campaign

This campaign utilizes a points-based system (via Taskon or similar quest platform) to incentivize authentic, verifiable community engagement before and immediately following the \$NOSHIT launch. Rewards (future \$GENIE or \$NOSHIT Airdrops) will be distributed on a pro-rata basis, meaning the more points a user earns, the larger share of the total reward pool they receive.

### 1. Campaign Structure

The campaign is divided into phases, with the voting quest now focused on the strategic launch method.

Quest Activity	Points Awarded (One-Time)	Reward Rationale
Follow @cryptotaurus on X	100 Points	Core brand visibility.
Follow @noshitcoin on X	100 Points	Project-specific hype.
Follow @genielaunchpad on X	100 Points	Platform visibility.
Subscribe to Cryptotaurus YouTube	200 Points	High-value, long-term content engagement.
Vote in the NOSHIT Launch Method Poll	300 Points	Highest value, contributes directly to the token's strategic launch and fee structure.
Presale Contribution (Verification)	500 Points	Reward commitment to the project (subject to vesting).
Quest Activity	Points Awarded (Daily/Per Post)	Reward Rationale
Like any GENIE/NOSHIT X Post	5 Points (Max 25/Day)	General engagement and algorithm boost.
Retweet/Quote any GENIE/NOSHIT X Post and post Cryptotaurus YouTube video	10 Points (Max 50/Day)	High-value, widespread distribution.

## 2. Reward Distribution

The **Influencers/Rewards** pool (30% of the \$NOSHIT tax revenue) will be utilized to fund the rewards distributed based on the total points accrued by the community:

User Reward Share = {User's Total Points / Total Campaign Points} X Total Reward Pool

This model ensures transparent and proportional compensation for the earliest and most dedicated contributors.
